PROFILE

Applied AI/ML Engineer with a background in data platforms and production ML. Translates financial modeling requirements into working systems, collaborates across risk and finance teams, and improves platform and model execution performance.

EXPERIENCE

JPMorgan Chase — Applied AI/ML Engineer

Nov 2024–Present

- Projects: Business Banking Loan Wrapper and Prepayment; Business Banking Prepayment OPM; Business Banking Funds Transfer Pricing. Supported financial forecasting and Net Interest Income projections.
- Built a Funds Transfer Pricing (FTP) model in a CCAR context; improved model execution performance through Spark cluster optimization.
- Improved prepayment model accuracy through feature additions and removals.
- Engineered amortization standardization for fixed, floating, and balloon loan structures; implemented fair value models aligned with FAS 107 requirements.
- Owned ML lifecycle activities across ingestion, feature engineering, training, deployment, and monitoring using SageMaker, Airflow, Docker, and Kubernetes.
- Created reusable skill files to improve productivity and collaborated with risk, finance, and regulatory stakeholders.

Advance Auto Parts India — Associate Data Engineer

Jul 2022–Nov 2024

- Built enterprise data pipelines and analytics platforms using Snowflake, Python, SQL, and AWS.
- Worked with CDC, streams, tasks, masking policies, Snowpipe, query tuning, platform administration, monitoring, and cost optimization.
- Collaborated on Terraform infrastructure configuration and AWS services including Glue, Lambda, S3, DynamoDB, IAM, SNS, and SES.

EPAM Systems — Automation Test Engineer Intern

Feb–Jun 2022

Automation testing internship.

SELECTED PERSONAL PROJECT

Meet Pushpa — Interactive Digital Twin

Shipped a recruiter-facing website with curated profile retrieval, source-labeled chat, project walkthroughs, role keyword analysis, and optional browser speech. Built using JavaScript, HTML, CSS, Node.js, automated tests, and GitHub Actions / Pages. Current assistant is deterministic; no live LLM or LangChain / LangGraph integration is claimed.

TECHNICAL SKILLS

Python · SQL · PySpark · Snowflake · Snowpark · AWS · Databricks · MLflow · SageMaker · Airflow · Docker · Kubernetes · Terraform

ACHIEVEMENTS & CERTIFICATION

Hackathon Winner — Advance Auto Parts, Oct 2024
TIF DeepRacer Runner-up — JPMorgan Chase, May 2025
SnowPro Core — Issued Sep 2023; expired Sep 2025

EDUCATION

B.Tech, Information Technology — Vardhaman College of Engineering, 2018–2022
